## Redevelopment Old Building | eva lorey

Frankfurt | Germany | 2012

The ground floor of an old five-storey apartment building was converted back into living space after having served as commercial premises. The entire area of 100 m<sup>2</sup> was dismantled and reorganized. The original doors were restored and the single-leafed plastic windows replaced by wooden windows. Modern sanitary facilities and a new heating system were installed and all walls and ceilings smoothed out. The floor was laid with solid oak planks and the new bathroom was fitted with sand-colored porcelain tiles and bathroom furniture in solid oak.
